

GERSHINEN SHANDING

Founder & Data Scientist | Applied AI & Data Governance

Abuja, Nigeria | +234 802 903 3427 | pgshandino@gmail.com | linkedin.com/in/pgshanding | github.com/pgshandino | medium.com/@pgshanding

PROFILE

Nigeria-based data scientist and founder with six years of professional experience across public health data, economic analysis, and applied AI, now building technology companies of my own. I currently lead GERANDCO Technology, an AI, software and data consultancy, and serve as co-founder and CTO of Vetaly, a veterinary digital health platform. My work consistently centres on reconciling data across systems that were not built to share information with each other, and on translating technical work into outcomes non-technical stakeholders can act on. I hold a postgraduate diploma in economics, a master's in data science, and write publicly about applied AI and data practice.

CORE COMPETENCIES

Technical Leadership & Founding Teams • Applied AI and Machine Learning • Product & Data Analytics • Data Reconciliation Across Systems • Public Health and Programme Data • Technical Writing for Non-Specialist Audiences • Python, SQL, and R • Full-Stack Development (React, Node.js) • Business Development & Partnerships • Economics and Policy Grounding

PROFESSIONAL EXPERIENCE

Founder & CEO — GERANDCO Technology

Apr 2023 – Present

- Lead company strategy, partnerships, client contracts and delivery across AI agents, software development, data platforms and enterprise training engagements.
- Oversee delivery of in-house products including AREAI, a conversational AI assistant for real estate workflows built on retrieval-augmented generation.

Co-founder & CTO — Vetaly

Jan 2026 – Present

- Built and maintain the technical platform for Vetaly's animal health management product — veterinarian connections, health record tracking, and antimicrobial-use (AMU) surveillance — and own its uptime and reliability.
- Set up product and data analytics instrumentation to track acquisition, activation and monetisation.

AI Consultant — NGEX

Dec 2025 – Present

- Explore and implement applications of AI across NGEX's business processes and products, part-time alongside other roles.

Facilitator, Data Science and Analytics Programme — Seedbuilders Innovation Hub

Jul 2024 – Present

- Design and deliver training on data science and applied AI, evaluating participant work and documenting course material for reuse.

Python Data Scientist — eHealth4everyone

May 2023 – Dec 2024

- Built predictive models from public health programme data drawn from multiple facility- and MIS-level systems, most of which were not designed to share data with each other.
- Reconciled discrepancies across data sources, tracing figures back to their origin and flagging gaps rather than smoothing over them, before any analysis reached decision makers.
- Translated technical findings into recommendations for health policy stakeholders, working across the gap between technical and non-technical audiences.

Data Scientist — Data-Lead Africa

Aug 2022 – Apr 2023

- Analysed economic and social datasets and reported findings directly to policy and business stakeholders.
- Built dashboards and briefs used for stakeholder reporting, and trained junior analysts on analysis standards.

Data Analyst — NGEX

Mar 2021 – Mar 2023

- Analysed user behaviour and engagement data, producing reports that shaped business strategy.

SELECTED TECHNICAL PROJECTS

- OneAgent — a full-stack personal income tax platform implementing Nigerian FIRS graduated tax bands, processing personal financial data with direct attention to data access and consent.
- Crypto trading decision engine — an AI-orchestrated trading system built on a custom library of hundreds of technical indicators, with a FastAPI service layer.
- Published writing on applied AI — articles on agentic AI design patterns, data quality, and imbalanced datasets, in CodeX, Python in Plain English, and Data Science Collective.

EDUCATION

- Master's in Data Science — Nigerian Defence Academy (2026)
- Postgraduate Diploma in Economics — National Open University of Nigeria (Ongoing)
- Bachelor's Degree in Computer Science — University of Jos

CERTIFICATIONS

- Certificate in Applied Data Science (Honors) — WorldQuant University
- Nanodegree in Data Analytics — Udacity
- Registered Member — Computer Professionals Registration Council of Nigeria (CPN)
